

Name	dr hab. Piotr Hulisz, prof. at NCU
Affiliation	Department of Soil Science and Landscape Management, Faculty of Earth Science and Spatial Management, Nicolaus Copernicus University, Toruń, Poland
	
Main research interests	Soil scientist and geographer focused on the following issues: <ul style="list-style-type: none"> - the genesis, properties, systematics, and environmental role of salt-affected and acid sulfate soils in Poland, - human impact on soil properties, their functioning in the landscape, and systematic position, - analysis of pedodiversity in the urban landscape. In addition, engaged in interdisciplinary research which include: <ul style="list-style-type: none"> - analysis of the relationship between abiotic habitat features and the spatial diversity of vegetation, - reconstruction of palaeogeographic conditions in the vicinity of closed depressions in the young glacial landscape using geochemical methods, - the influence of soil properties on plant microbiomes.
