

<b>Name</b>	<a href="#">prof. Markku Yli-Halla</a>
<b>Affiliation</b>	Department of Agricultural Sciences University of Helsinki, Finland
	 A portrait of Prof. Markku Yli-Halla, a middle-aged man with short grey hair, wearing a checkered shirt and glasses perched on his head. He is standing in front of a bush of pink flowers.
<b>Main research interests</b>	My research concentrates on soil fertility and soil classification (WRB, Soil Taxonomy). More specifically, acid sulphate soils, long-term P fertilization, and management of agricultural peat soils are currently on my agenda. I regard promotion of soil science knowledge in the society as an important duty of our scientific community.
