III. Soil threats and security

Session Chair:

prof. Masayuki Kawahigashi (Tokyo Metropolitan University, Japan)

dr hab. Piotr Hulisz, prof. assoc. at NCU (Nicolaus Copernicus University, Poland)

Intensification of agriculture and increased urbanization to support a growing human population pose a serious problems to many *ecosystems*. Therefore, monitoring of soil threats, reasonable spatial planning and protection of the soil environment are foundations of sustainable soil management and security in the strongly anthropized landscapes.
